Protein Skimmer

LLDPE Protein Skimmer

The body of this series protein skimmer is made from UV rated linear low density polyethylene (LLDPE) material, which makes the protein skimmer rugged, ozone safe and UV-resistant, and adopts rotationally molded design, it is once piece, eliminating potential leaking and failures from seams and weld points. Equipped with an automatic washdown system and touch screen controller for a simple and convenient programming of rinse cycles for the internal and external cone. It is designed to carry out the protein fractionation process efficiently and help to save the operation and maintenance cost. At the same time, stocking densities and growth rates are all enhanced and animal health improved.

Protein Skimmer WL-WPSB

In the water recirculating aquaculture or aquarium project, if the protein in the water is not removed in time, excessive accumulation will cause the water to appear milky white or yellow, even after decomposition, it will damage the water quality seriously and produce toxic substances, such as ammonia nitrogen, nitrite, nitrate, phosphate, etc. This high efficient protein skimmer is designed to remove these impurities.
