Air source heat pump

The water temperature in nature varies with the environment, stable temperature is critical to the animal health, therefore temperature control is critical. Different animals have different requirements for water temperature, some need constant temperature of heating, while some need constant temperature of cooling. Laswim heat pump is a perfect, cost-effective and environmental-friendly solution that can maintain the water temperature constant by heating or cooling.

The water temperature in nature varies with the environment, stable temperature is critical to the animal health, therefore temperature control is critical.

Different animals have different requirements for water temperature, some need constant temperature of heating, while some need constant temperature of cooling. Laswim heat pump is a perfect, cost-effective and environmental-friendly solution that can maintain the water temperature constant by heating or cooling.

Features:

- Premium materials and components of recognized brands, providing great stability and high efficiency.
- Dual coil titanium heat exchanger enlarges the heat exchanging surface, more efficient.
- Hydrophilic fin heat exchanger with superior performance, high efficiency and anti-corrosion.
- Advanced electric expansion valve automatically adjust the refrigerant flow rate, ensuring that the units operate with high efficiency in all weather conditions.
- Reliable scroll compressor with precise energy stage settings ensures to achieve the desired energy saving effect.
- Safety and environmental protection: The structure is completely separated from water and electricity, and there is no harmful or toxic gas discharged or burned.

- Easy to operate and maintain, adopts smart computer control system, one time setting, intelligent operation, control the water temperature and operation automatically and precisely.
- Multiple and careful protection to ensure safety and long life time.

User benefits:

- Save cost: Heat pumps are very energy efficient. A heat pump is able to move far more energy than it uses, at least 50% cheaper than gas or coal heating.
- Faster grow rate, higher reproduction rate and lower mortality rate because of the precise and optimum water temperature control.
- Heat pumps are proved to be safe and trouble-free, require minimal service to maintain the best performance.
- Eco-friendly: Produces zero harmful emissions or Co2, unlike gas and coal (better for the environment).
- Users can customize their heat pump according to actual application requirement.

Technical parameters:

Model			AP-SSPA-18	AP-SSPA-21	AP-SSPA-26	AP-SSPA-35	AP-SSPA-42
